Important note on validity and adding vouchers		
	Unit based vouchers – On adding a new unit based voucher to an existing balance, balance expiry will always be the greater of either 1. the current balance expiry or 2. the expiry period of the new voucher – not cumulative of the two. Buy and add at the end of current validity to secure best value. 0 unit 30 day extensions – with these vouchers the validity is automatically added to the end of the current validity period. Therefore multiples can be purchased and added together and vouchers can be added at any time.
